## SweetHome "A" Model Updates - 2011

### Hood & Chassis

#### Hood

- 1) Vent pins rotated 180 to top to allow for hopper lid opening.
- 2) Add SweetHome Logo badge in center of hood.
- 3) Change hood pivot to larger brass support. Replace hardware with SS cap nut.
- 4) Close (reduce) rear vent space by .120.

#### Chassis

- 1) Add heat shields for SH450 to protect chassis paint.
- 2) Increase grease drip tray material thickness.
- 3) Change grease drip bucket to hang from upper tube (no grease on handle).
- 4) Change main wheels from 6" to 7". Improved tread and tire.
- 5) Change swivel caster to steel base with brake.

#### Hopper

- 1) Change lid fasteners to SS with locking nuts.
- 2) Add additional wire slack for main board service.
- 3) Update main power switch to black with red "On" marker.

#### Operation

- 1) Revision of operating software improves start up time to under 9 minutes.
- 2) More tolerant of fuel BTU ranges.
- 3) Added air for combustion helps to keep burn tray cleaner.
- 4) Separate coding for 450/650 improves 650 operation with full food on grill.
- 5) Addition of model ID on power up i.e. "450" or "650".
- 6) Increase hole size for LED's for easier viewing.
- 7) Increase the number of holes for the speaker so easier to hear.

#### General

- 1) Update manual with additional operation information and trouble shooting.
- 2) Addition of S1 models with SS hopper lid and side shelf.

Total of 21 improvements and or updates.
